

**Hochikl Europe (UK) Ltd - Marine Back Box - MBB-1
Installation Instructions**

Fixing Back Box to Surface

The back box should be mounted to a flat and clean surface, using the two pre-drilled (4mm dia) fixing holes and then fixed using two appropriate fixings. Three 20mm threaded cable entries are provided. The cable glands (supplied) should be fitted to the back box such that the watertight integrity is maintained. Unused cable entries should be sealed using blanking plugs (supplied).

Fixing Base to Back Box

Fit the base using two screws (supplied). Note: Do not overtighten. The base and detector should be wired and fitted as per their installation instructions.
