

Orbis Marine TimeSaver Base

Datasheet Version 1.2

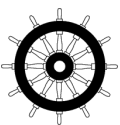

For Orbis Marine conventional detectors
For use in marine environments
Modern, low-profile design
Grouped terminals to make termination easy

Fire
detection

Marine and
offshore

Orbis Marine TimeSaver Base

Datasheet Version 1.2

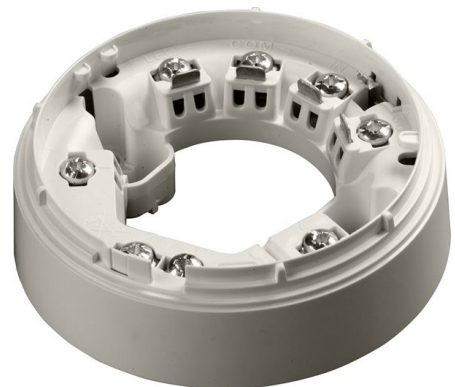

Orbis Marine conventional fire detectors offer a wealth of features to save time, enhance reliability and reduce false alarms within the marine environment. These include drift compensation and DirtAlert®, a feature that warns Service Engineers via a flashing yellow LED that detectors need maintenance; and patented FasTest®, a procedure that takes just four seconds to test smoke detectors and confirm that they are functioning correctly.

Orbis Marine TimeSaver Base (ORB-MB-00001-MAR)

The Orbis Marine TimeSaver Base is a completely new design that provides installers with an open working area with fixing holes shaped to allow a simple mounting procedure.

Orbis Marine TimeSaver Relay Base (ORB-RB-40004-MAR)

The Orbis Marine Relay Base incorporates a single-pole voltage-free changeover contact for switching ancillary equipment. When the detector changes to the alarm state, the relay is energized, causing the contact to change state. The contact will remain in this condition until the detector is reset.
