

Orbis TimeSaver Conventional Detector Bases

Datasheet Version 1.2

Suitable for Orbis conventional detectors

Multiple variants available

Discreet profile

Rapid detector installation

Fire
detection

Orbis TimeSaver Conventional Detector Bases

Datasheet Version 1.2

Orbis TimeSaver Base (ORB-MB-00001-APO)

Designed to provide an open working area and the ability to be mounted quickly. A detector locking mechanism allows for the detector head to be securely fixed to the base.

Orbis TimeSaver bases are fitted with a continuity switch by default.

Orbis TimeSaver Base LX without continuity switch (ORB-MB-00002-APO)

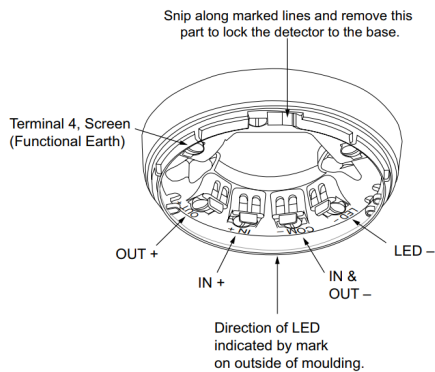

The TimeSaver® Base is a design that provides installers with an open working area with fixing holes shaped to allow a fast mounting procedure. This version does not include a continuity switch.

Orbis Timesaver Diode Base (ORB-DB-00003-APO)

The TimeSaver Diode Base has the same design as the standard TimeSaver Base with the addition of a diode. It is used in systems which use active EOL monitoring for head removal.

Orbis Timesaver Relay Base (ORB-RB-10004-APO)

The TimeSaver® Relay Base incorporates a single-pole voltage-free changeover contact for switching external equipment. When the detector changes to the alarm state, the relay is energized, causing the contact to change state. The contact will remain in this condition until the detector is reset.

Orbis TimeSaver Conventional Detector Bases

Datasheet Version 1.2

Orbis TimeSaver Marine Base (ORB-MB-00001-MAR)

The Orbis Marine TimeSaver® Base provides installers with an open working area with fixing holes shaped to allow a simple mounting procedure. Marine timesaver bases unit hold the following approvals:

Orbis TimeSaver Marine Relay Base (ORB-RB-40004-MAR)

The Orbis Marine Relay Base incorporates a single-pole voltage-free changeover contact for switching ancillary equipment. When the detector changes to the alarm state, the relay is energized, causing the contact to change state. The con-

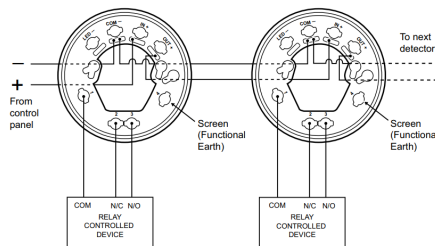

Orbis IS Timesaver Base (ORB-MB-50018-APO)

The Orbis IS TimeSaver® Base provides installers with an open working area with fixing holes shaped to allow a simple mounting procedure.

Orbis Deep Timesaver Base (ORB-MB-00019-APO)

The TimeSaver® Deep Base is a mounting base for Orbis products which has an increased depth allowing for cables to be inserted into the side of the product.
